Meet the Newest Members of the Edger Family

Offering Innovation, Quality, and Value From the Name You Know and Trust

The CE7 toe-kick edger was designed and innovated to effectively reach under cabinets and shelving while providing ample room to maneuver.

Its design gives you more than 5 inches of reach if the obstruction is only 3.5 inches off of the ground. The CE7 is perfect for sanding along wall lines, closets, and stair landings.

The SE7 model is designed to sand along wall lines, closets, and stair landings. It combines versatility with smooth operation to create results that pros demand.

The SE7 represents the first new ground-up standard edger in over 50 years. Experience the difference in quality with this new standard edger from the name you know.

The CE7 and SE7 models are loaded with features and benefits that make them an ideal and perfect addition for any sanding fleet:

- Quick-release dust bag with built-in internal support
- Dual casters with soft non-marking wheels
- Hook and loop or bolt-on sandpaper-ready
- Dual-speed motor design
- Safety ON/OFF switch
- Smooth operation
- Powerful LED lighting
- Durable aluminum housing

SEE THE DIFFERENCE

A powerful and bright LED light on the Pro+ models illuminates even the darkest areas, allowing you greater visibility than ever before.

When compared to the previous light offerings from other edgers, the Pro+ models shine the brightest and the furthest.

The Pro+ edgers can be conveniently raised for added comfort and control.

The conveniently-placed switches provide extra convenience and comfort whenever you need to change motor speeds or safely start the edger.

- The dual-speed switch operates like any normal switch and is conveniently located where your left hand rests.
- The new safety-start switch prevents accidental starts.

The included do-it-all tool conveniently stores in between the edger body and the dust bag.

Sandpaper Versatility

The **Pro+** models offer versatility unseen by most. These machines are capable of using either hook and loop or bolt-on sandpaper for added convenience.

It's up to **you** which type of paper you prefer!

SPECIFICATIONS	CE7 PRO+	SE7 PRO+
